Top Secret Security Clearance

## Summary

Software developer with experience writing web applications from scratch across multiple technology stacks. Passionate about developing solutions that positively impact lives. Eager to leverage excellent communication, strong relationship management, and technical skills as part of a software team.

## Technical Skills

HTML, CSS, Javascript, Typescript, C#, Python, Java, Kafka | React, Angular, Django, Restful API's, NodeJS Mongoose, MongoDB | Bootstrap, SCSS, Tailwind, Ant Design | Microsoft Suite, Affinity Suite, Figma, Azure Service, AWS Services

## Professional Experience

### Senior Consultant Developer | Allata

Remote | 2021 - present

- Implemented Azure Active Directory Single Sign-On for secure user authentication, enhancing user experience and security across front-end and back-end systems.
- Elevated API performance and compliance by standardizing Node.js codebase according to REST principles, including correct status codes and response formats.
- Overhauled .NET/MySQL application features for a client leveraging AWS services, optimizing event handling from AWS Lambda, and integrating feature flags for phased feature rollout.
- Designed custom Angular components based on the client's needs
- Revitalized front-end architecture to increase code reusability and consistency, reducing style duplication and fostering a modular design approach.
- Authored comprehensive documentation and style guides to streamline development processes and enhance team capability in adopting new technologies.
- Functioned as Scrum Master within an Agile team, leading stand-up retrospectives and ensuring adherence to Agile methodologies for optimal project delivery.
- Maintained continuous client engagement, ensuring transparency in progress and aligning deliverables with the client expectations; led demonstrations on demo days to showcase new features.

### Freelance Web Development | AyeZeeWebDesigns

2023 - present

- Collaborated with businesses to understand their website needs, translating requirements into functional and visually appealing designs and implementing changes to ensure continuous alignment with client objectives.
- Engineered a custom CMS using Node.js and Angular, allowing users to manage website content effectively through a RESTful API.
- Built and integrated a user authentication system from scratch, enhancing security and user management capabilities for client applications.

### Ranger Team Leader | US Army

Savannah, GA | 2013 - 2019

- Led and mentored a diverse team of 5 people; Facilitated readiness training and delivered strategic advice that ensured each team member was prepared to make intelligent decisions across operational goals and promotions.
- Analyzed and created detailed reports that informed and enabled leadership to plan and produce highly successful project objectives and several cross-department personal growth strategies
- Earned achievement awards for exemplary service, heroism, and meritorious achievements throughout multiple combat deployments: The Combat Action Badge, Ranger Tab, and two Army Commendation Medals

## Education

### Coding Dojo | Full Stack Developer Certificate

Remote - San Jose, CA | 2021

- Intensive Full-Stack Training Program: Python, Java, and MERN
- 14 weeks, 50-80 hours/ week; pair programming, testing, algorithms.
- Achieved highest honors, "Black belt" on all three exams for each stack.
